EDUCATION

Queen Mary University of London | London, UK
- **BSc Computer Science** | 2024 – 2027 | Expected Graduation: 2027
- **Relevant Modules:** Algorithms & Data Structures, Software Engineering, Database Systems, Operating Systems, Internet Protocols & Applications, Data Mining, Big Data Processing, Distributed Systems, Security Engineering, Compilers

The Petchey Academy | London, UK | 2017 – 2024
A-Levels: Mathematics (A*), Further Mathematics (A), Computer Science (A)

EXPERIENCE

J.P. Morgan — Technology Division Summer School | Canary Wharf, London
Participant | August 2023
- Explored how technology and large-scale systems support operations within a global financial institution.
- Worked on a secure model-bank concept and delivered a technical presentation explaining the proposed design.
- Developed understanding of technology teams, enterprise systems and cross-functional collaboration within financial services.

SAR Computing | Wimbledon, London
Front-End Intern | April 2023 – May 2023
- Assisted with front-end development using HTML, CSS and JavaScript.
- Collaborated with developers to test and debug web applications and improve usability and performance.
- Gained experience of development workflows, project delivery and communication within a professional technology environment.

McGill & Partners | London
Intern | May 2023 – June 2023
- Shadowed a facultative broker, gaining first-hand exposure to the insurance and reinsurance broking process within a professional environment.
- Observed how brokers assess information, communicate with stakeholders and support the placement of individual risks.
- Developed commercial awareness and an understanding of how analytical decision-making, data and client relationships contribute to the broking process.

Projects

Trading Simulator | JavaScript, HTML, CSS

- Designed and developed an interactive browser-based trading simulator featuring a simulated stock market with dynamic price movements.
- Implemented stock purchasing and selling, portfolio management, weighted-average cost calculations and real-time profit and loss analytics.
- Built an interactive dashboard and transaction history with persistent browser storage, allowing portfolio data to be retained between sessions.
- Applied validation and state-management logic to maintain accurate cash balances, holdings and transaction records.

Accountify | Expense Management System | React, Node.js, Express, SQLite

- Collaborated in a university software engineering project to develop a full-stack expense management platform supporting consultants, managers, finance teams and administrators.
- Contributed to a React frontend and Express/Node.js backend integrated with a structured SQLite relational database.
- Applied software engineering practices including requirements analysis, database modelling, testing, debugging and collaborative development with Git.

TECHNICAL SKILLS

- **Languages:** C++, Python, Java, JavaScript, HTML, CSS, SQL
- **Frameworks & Technologies:** React, Node.js, Express, SQLite, Pygame
- **Tools & Platforms:** Git, GitHub, Linux, VS Code, Microsoft Office
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Database Design, Software Engineering, Operating Systems, Networking

POSITIONS OF RESPONSIBILITY

Youth Development Team Lead **September 2023-present**

• Working collaboratively with a team of 8, to work with the youth in the community

• Planned multiple local and national events, including activities and workshops, online and face to face

EXTRACURRICULURS

QMUL Men's Football Team **September 2024-present**

• Active team member demonstrating discipline, teamwork, and commitment through weekly training and competitive fixtures.

U19s Football Tournament, Dubai UAE **July 2025**

• Selected to represent my club internationally, competing against teams from multiple countries. Built resilience, teamwork, and performance under pressure
